

## June 1st, 2021 Policy Update - Mask/Face Covering Requirements for Vaccinated Coaches/Participants

- Coaches are no longer required to wear masks/face coverings if they are fully vaccinated and can produce proof within a reasonable amount of time upon request. Coaches who are not vaccinated will still be required to wear masks/face coverings until the completion of the spring season or their last team activity with their spring roster. Coaches who are found to not being wearing masks/face coverings, but falsely claiming they are vaccinated while acting in official league capacity are subject to disciplinary action including but not limited to removal from their coaching duties, suspension from the league and/or removal of their participants.
- Participants who are vaccinated are no longer required to wear masks/face coverings when not actively participating in sport activity. This means that these players are permitted to sit on the bench, in the dugout, stretch in groups, etc., without a mask or face covering on.
- All other participants are still required to wear masks/face coverings while not actively participating in their sport, but can continue to remove their mask/face covering when practicing, doing drills, playing games or actively participating in their sport.
